Dear Parent/Carer

## **Re: Changes to contact tracing**

The government has asked us to make you aware of the following:

Over the summer holiday education and childcare settings are no longer required to conduct routine contact tracing. As with positive cases in any other setting, NHS Test and Trace will work with either the positive case – or in the case of children – the parent or carers of the positive case to identify close contacts.

NHS Test and Trace already manages the contact tracing process for the rest of society and has expertise in supporting people to identify close contacts.

This letter sets out in more detail below how that process will work and what you need to do if your child tests positive for COVID-19 during the school summer holiday.

### Self-isolating and taking a test

1. If your child has symptoms, they and other members of the household should self-isolate. You should immediately order a PCR test for them. If the PCR result is negative, they and other members of their household can stop self-isolating (unless instructed to self-isolate for other reasons). If the PCR result is positive, they, other members of their household and any close contacts identified by NHS Track and Trace must self-isolate until 10 days after the onset of symptoms.
2. If your child has a positive result from a lateral flow device (LFD) test, they and other members of the household should self-isolate. You should immediately order a confirmatory PCR test. If the confirmatory test is taken within two days and the result is negative, they and other members of their household can stop self-isolating (unless instructed to self-isolate for other reasons). If the confirmatory PCR test is positive (or is taken more than two days after the LFD), other members of their household and any close contacts identified by NHS Track and Trace must self-isolate until 10 days after the LFD test.
3. PCR tests can be booked online through the [NHS Test & Trace website](#) or by calling 119.
4. PCR test results will be recorded with NHS Test and Trace automatically.

### Contact tracing

5. If your child gets a positive PCR test result, NHS Test and Trace will contact you, using the details you registered when ordering the PCR test. You and/or your child will be asked a series of specific questions designed to identify who your child has been in close contact with.
6. You will be asked to provide the contact details, if you know them, of any of the individuals – or their parents or carers– who have been identified as close contacts. NHS Test and Trace will then get in touch with these close contacts and provide appropriate instructions or advice (see below).

### Self-isolation and/or testing of close contacts

7. At present, anyone identified as a close contact is legally required to self-isolate (the only exception is if they are participating in a daily contact testing trial). Anyone identified as a non-household close contact by NHS Track and Trace must self-isolate until 10 days after the date of their most recent contact with that person. If they live in the same household, they must self-isolate until 10 days after the date of that person developing symptoms (see point 1 above) or, if that person was asymptomatic, the date of their test (see point 2 above). NHS Test and Trace will notify you of the day on which the self-isolation period ends.
8. Close contacts are also advised to take a PCR test. If the test result is negative, they must still complete the full self-isolation period, as the test will not detect all positive cases. If the result is positive, they will need to self-isolate for a further 10 days – and NHS Test and Trace will contact them to identify any close contacts.
9. **From 16 August**, if the close contact is under 18, they will not have to self-isolate (in line with the policy for fully vaccinated adults) but will be asked to take a PCR test immediately, other than for very young children identified as non-household contacts, and they will not need to self-isolate while awaiting the results of the test. If the PCR test is positive, they will be required to self-isolate for 10 days from the date of the test. NHS Test and Trace will then get in touch to identify close contacts (see points 5 and 6 above). Further guidance on these changes to self-isolation will be provided shortly.

We recognise how difficult the past 18 months have been and the sacrifices that all families, education and childcare settings have had to make. This has been an enormously challenging time for everyone and we would like to take the opportunity to thank you for everything you have done.

Yours sincerely

Sharon Japp  
Headteacher
