Dear Parents

Re: Measles, Chicken Pox and Shingles

We are writing for your co-operation on a vitally important matter. One of our pupils is undergoing medical treatment that causes immunosuppression. This puts the pupil at serious health risks if exposed to measles, chicken pox or shingles.

If you suspect your child has measles you should let the school know immediately. Our pupil is also at risk from chicken pox and would need to be given an injection within three days of contact. Please let us know immediately if you suspect that your child has chicken pox. It is also very important that you let us know if anyone in your household has shingles.

Your own child is not at any risk whatsoever from this situation. However, the health and wellbeing of the pupil undergoing treatment may be at serious risk. We depend on the co-operation of all parents and know we can rely on your help.
Many thanks.

Yours sincerely,

Headteacher
